Sub: Mock trading on Saturday, November 26, 2011 in Capital Market segment –
New NEAT CM version 9.17.00 and New TWS NEATPro version 1.0.1

The Exchange will be conducting a mock trading session in the Capital Market segment on Saturday, November 26, 2011 to test additional functionalities on trading system as per following schedule

Saturday, November 26, 2011	Time
Pre-open order entry open Time	10:00 hrs
Pre-open order entry close time (with random closure in last one minute)	10:08 hrs
Pre-open order Matching will start immediately after close of pre-open order entry	
Normal / Odd lot / Retail Debt Market Open	10:15 hrs
Normal / Odd lot / Retail Debt Market Close	12:15 hrs
Auction Market open time	10:30 hrs
Closing session start	12:25 hrs
Closing session end	12:30 hrs
Re-Login start time	15:00 hrs
Broadcast of mock successful/unsuccessful message	15:15 hrs
Re-Login stop time	15:30 hrs

Important Note to CTCL members before the mock trading:

Prior to the commencement of mock trading, members using CTCL application are advised to set up sufficient **Order Limits** for their NEAT CTCL user ids by taking login in NEAT/NEATPLUS with the respective NEAT CTCL user id. This step is recommended to be completed by Friday, November 25, 2011. The Order Limits functionality can be accessed under Supplementary Menu (F12)>Order Limits in NEATCM and under Dialog Menu>Order Limits in NEATPLUS. Members

Telephone No	Fax No	Email id
022-26598153/56/57 Technical Queries : 26567500	022-26598155	cmtrade@nse.co.in

are cautioned that unless they setup sufficient Order Limits using NEAT/NEATPLUS for their CTCL user ids, they will not be able to place orders from CTCL application during mock trading session and on Monday, November 28, 2011.

Important note for NEATPlus users:

Members are requested to note that NEATPlus version has been incorporated into the NEATPro application and discontinue the standalone version of NEATPlus application (NEATPlusTWSSetup.exe). Henceforth, NEATPlus version access shall be available through NEATPro application only. **For detailed installation instructions of NEATPro, members may kindly refer to the circular no. 063/2011 download no.19430 dated November 24, 2011 regarding introduction of new Trading Work Station NEATPro.**

Upon successful completion of mock trading, NEAT version 9.17.00 and NEATPro version 1.0.1 will be implemented in live environment with effect from Monday, November 28, 2011. Members who do not participate in the mock sessions or do not have NEAT version 9.17.00 or NEATPro version 1.0.1, shall not be able to trade using old version of NEAT and NEATPlus from November 28, 2011 onwards.

For other important instructions regarding the mock trading, members may refer to the following annexures:

Annexure 1: Important Instruction for pre and post installation of the new version

Annexure 2: New functionalities in the trading system

Annexure 3: Changes in existing functionalities

Annexure 4: VWAP report for members

Annexure 5: Installation procedure for NEAT CM (*Version 9.17.00*)

Annexure 6: Precautions and procedure for reverting to earlier versions

**For and on behalf of
National Stock Exchange of India Limited**

**Suprabhat Lala
Vice President**

ANNEXURE – 1

Important Instruction for pre and post installation of the new version

- Trades resulting from the mock trading session shall not attract any obligation in terms of funds and / or securities pay-in and pay-out. Members are also requested not to transfer any data files for this mock trading session.
- Members using NEAT, NEATPro and CTCL facility (using their CTCL software) are advised to participate actively in the mock trading session and are required to re-login into live environment during the above mentioned timings to check the connectivity and also to avoid login problems on Monday, November 28, 2011.
- In case of technical queries, members are advised to contact helpdesk no: 022-26567500.
- The successful / unsuccessful outcome of the mock trading session shall be intimated to members through a message broadcast as per above schedule.

ANNEXURE – 2

New functionalities in the trading system

NEAT

1. Modification in Net position:

The following new features are provided in Net Position window:

a) *View transaction costs incurred on position/s*

- The user shall be provided a dialog box to set the following values:
 - Securities Transaction Tax (STT)
 - Stamp Duty
 - Transaction Charges
 - Other Charges
- The above changes shall be set by the user at the following levels:
 - PRO Buy/Sell
 - CLI Buy/Sell

Parameters	Securities Transaction Tax (STT) %	Stamp Duty %	Transaction Charges %	Other Charges %	Total Transaction Costs %
PRO BUY					
PRO SELL					
CLI BUY					
CLI SELL					

- On pressing the “Calculate” button total transaction costs will be calculated and on pressing the “Save” Button, those entered values will be saved in backup folder with the name **BakSetCharges*Userid*.dat**
- The total transaction costs (%) shall be calculated as follows:
$$\text{Total transaction costs} = \text{STT} + \text{Stamp Duty} + \text{Transaction Charges} + \text{Other Charges}$$
- The total transaction costs shall be displayed in Rs. Lacs under an additional column in the Net Position window **which should be referred as “Total Cost (in lacs)”**.
- The proposed values shall be computed as:
 - Buy Value = Buy Qty * Buy Price
 - Sell Value = Sell Qty * Sell Price
 - Net Value = (Sell Value – Buy Value) – Total Transaction Costs.

- In case of buy, transaction cost will be added to buy value and in case of sell transaction cost will be reduced from sell value
- A new button "Set Charges" is added on Net Position window to invoke Transaction Costs dialog box.

2. VWAP - Volume-Weighted Average Price “VWAP” Instruction Entry

- a) A new facility ‘VWAP Instruction Entry’ has been provided to the TWS users.
- b) VWAP instruction will place the orders for quantity and time intervals as specified by the user.
- c) User can invoke VWAP Instruction entry window by pressing Ctrl + F11 in NEAT & Ctrl+Shift + F11 IN NEATPlus.

VWAP Instruction Entry

Book Type: Symbol: Series:

Buy/Sell: Instruction Pro/Cli: Client A/C No: Participant ID:

Quantity: Price: Trig Price: DQ % Per Tranche:

☒ Enter Time Preference: ☒ Uniform Tranche ☐ Differential Tranche

Start Time: End Time: Time Gap: No of Tranches:

Tranche Release Time: Allocation Rate (in %): Tranche Quantity:

Tranche No.	Tranche time	Allocation Rate (in %)	Tranche Quantity	DQ Per tranche
1	17:00:00	10.00	1000	200
2	17:06:00	10.00	1000	200
3	17:12:00	10.00	1000	200
4	17:18:00	10.00	1000	200
10	17:54:00	10.00	1000	200

- d) VWAP instruction can be submitted only for the regular lot order book (RL).
- e) The user can place VWAP instructions in the S&P Nifty securities only.
- f) Minimum VWAP instruction value and minimum quantity and / or value per tranche will be pre-set by Exchange and intimated to member from time to time.
- g) Number of tranches for each VWAP instruction cannot exceed 50.
- h) The user can place BUY or SELL VWAP instruction at market price or at limit price. DAY and IOC time validity is allowed.
- i) The trigger price is an optional field. If market touches the Trigger price or become worse, the VWAP instruction will be cancelled.
- j) The total order qty should be entered by the user before setting any tranches.
- k) Tranche level information can be entered in two ways viz: uniform tranches or differential tranches.
- l) If the user selects the uniform tranches option:**

- The Start time, End time and Time Gap fields will get enabled.
- It is mandatory to enter Start time and End time fields if the user selects uniform tranche option.
- Any one field either number of tranches or time slice (time gap) needs to be entered.
- No of Tranches should be filled with a number which is in between 1 and 50.
- If user clicks over Confirm button after entering the above fields, tranches will be generated and quantity will be equally distributed among all the tranches. If there exists any balance quantity, will be adjusted in the last tranche.
- The time preference of VWAP instruction will be auto modified to Differential Tranche, if user modifies any of the fields of tranches which were generated under Uniform Tranche time preference.
- After entering all above fields when user presses Submit button, TWS will perform validations for all the fields, if any error occurs then the message will be displayed on the instruction entry screen.

2				
3	HH:MM:SS	70.00	7000	1400

m) If the user selects differential tranche:

- The Start time, End time and Time Gap fields will get disabled.
- If the user selects differential tranche option, Confirm button will get modified to Set button.

- User needs to enter the number of tranches & allocation % and then click on set Button. First tranche will be created and rest empty number of tranches will be generated which the user will be able to modify as and when required.
- No of Tranches should be filled with a number which is in between 1 and 50. It becomes a mandatory field if the user selects Differential Tranche option.
- Time Gap is an optional field and should be filled with the time duration gap between two tranches. (This field is not mandatory if number of Tranches field is provided)
- User has the facility to add new tranches. Depending upon the release time, the newly added tranche shall be placed accordingly in the detailed window.
- User has the facility to modify any of tranche shown in the list box but not the last tranche. The user has to select the tranche from the list box which he wants to modify. The data will populate in the above edit boxes. After clicking on the Modify Tranche, the data will be updated in the tranche details. User can modify the tranche release time, allocation% or quantity. Only release time of the last tranche can be modified.
- User has the facility to delete any of the tranches shown in the list box but not the last tranche.
- If user selects one row from list box and clicks over move up button, the tranche quantity will swapped with the above tranche.
- If user selects one row from list box and clicks over Move Down button, the tranche quantity will swapped with the below tranche.
- After entering all above fields when user presses Submit button, TWS will perform validations for all the fields, if any error occurs then the message will be displayed on the instruction entry screen.

n) Enter the VWAP instruction from TWS front end using upload facility:

- User can load the file using Load option.
- The file format for the upload file is as follows:

VWAP Instruction Entry

Book Type: Symbol: Series:

Buy/Sell: Instruction Pro/CLI: Client A/C No: Participant ID:

Where:

- Reference no is 1 for instruction record and reference no is 2 for tranche record.
- The file should be comma separated file and .csv and .txt files are allowed to upload.
- All the tranche records after the instruction record will be considered as the tranches for the same instruction until another instruction record is encountered.
- The file can be loaded with the help of Load button. The successfully loaded instructions will be shown in the load grid as follows:

VWAP Instruction Entry

B	ABB	EQ	100	900	1234	HDFC
B	ACC	EQ	100	900	1234	HDFC
B	DLF	EQ	100	900	1234	HDFC
B	DLF	EQ	100	900	1234	HDFC

Save Delete View Details/Modify Select All Clear All Send

- Once the load is successful, Save button will be available and Load button will not be available to the user.
- User can modify or view the instruction details by clicking the View Details/Modify button.
- User can delete the instruction by using Delete button.
- To send the instructions, the user must select instructions from the list box and click on the Send button.

- If the instruction is sent, the status will be shown as “Sent” in the list box, or an error number will be shown.
- The out file will be created in the NTNSECM folder with the name vwap_offln_out.txt.
- Save button is provided to the user to save the details of the instructions in a file. The instruction (Modified or not) will be saved to the input file.

o) VWAP instruction Inquiry:

- User has the facility to inquire both TWAP and VWAP instruction from the same screen.
- Instruction inquiry screen is invoked by CTRL + F8 key.

TWAP/VWAP Id	Symbol	Series	Buy Sell	Trigger Price	Execution Status	Branch Id
27	ABAN	EQ	B	0.00	100.00%	10
34	ABAN	EQ	B	0.00	100.00%	10
59	ABAN	EQ	B	0.00	100.00%	10

- User is required to select the inquiry type as VWAP to get VWAP instruction.
- Either Symbol and series or Branch id and user id are the mandatory fields. Once entered the fields and user presses Submit button.
- Secondary inquiry screen which is available only to dealer (self) is shown below:

Tranche No.	Order Number	Time	Tranche Quantity	Disclosed Quantity	Allocation Rate	Traded Quantity
1	2011110300000418	15:05:00	1000	0	10.00%	0
2	2011110300000428	15:10:30	1000	0	10.00%	0

10		15:54:30	1000	0	10.00%	

- p) For additional details member are requested to refer “Help” menu.

3. Order limits

- a) Currently, a user can set order limits for self through the Order Limits screen which can be invoked from supplementary menu by selecting the option 'Order Limits'. This facility is now made available to corporate manager (CM) to set and view limits for all the users under CM. Similarly the branch manager (BM) shall be able to set and view limits for all users under BM. BM will not be able to Set Limits for self.

Order limits

Order Limits

User Id : 271

Order Value (in lacs) 10.00 Order Quantity 555555 ☐ Unlimited

Market Price Protection 0.50 %

- b) Order limit in value cannot be more than the User Order Value Limit (UOVL). For existing cases where Order Limits in value is more than UOVL, Order limit in value will be adjusted to UOVL.
- c) Order limits shall enable the user to specify maximum value per order and maximum quantity per order that can be entered.
- d) All market and limit orders shall be validated by the Exchange against the Order Limits of the user.
- e) For updation/inquiry of limits CM/BM needs to select the user id from the drop down list for which the inquiry/updation of limits needs to be done and click the Check Limit button. After updating the limits, CM/BM should click the Enter button to save the changes.

1. Modification in Net position:

The following new features are provided in Net Position window:

a) *View transaction costs incurred on position/s*

- The user shall be provided a dialog box to set the following values:
 - Securities Transaction Tax (STT)
 - Stamp Duty
 - Transaction Charges
 - **Other Charges**
- The above changes shall be set by the user at the following levels:
 - PRO Buy/Sell
 - CLI Buy/Sell

Parameters	Securities Transaction Tax (STT) %	Stamp Duty %	Transaction Charges %	Other Charges %	Total Transaction Costs %
PRO BUY					
PRO SELL					
CLI BUY					
CLI SELL					

- On clicking the Calculate and Save buttons, values computed shall be saved.
- The total transaction costs (%) shall be calculated as follows:
$$\text{Total transaction costs} = \text{STT} + \text{Stamp Duty} + \text{Transaction Charges} + \text{Other Charges}$$
- The total transaction costs shall be displayed in Rs. Lacs under an additional column in the Net Position window **which should be referred as “Total Cost (in lacs)”**.
- The proposed values shall be computed as:
 - Buy Value = Buy Qty * Buy Price
 - Sell Value = Sell Qty * Sell Price
 - Net Value = Sell Value – Buy Value – Total Transaction Costs.
- In case of buy, transaction cost will be added to buy value and in case of sell transaction cost will be reduced from sell value
- A new button "Set Charges" is added on Net Position window to invoke Transaction Costs dialog box.

- d) VWAP instruction can be submitted only for the regular lot order book (RL).
- e) The user can place VWAP instructions in the S&P Nifty securities only.
- f) Minimum VWAP instruction value and minimum quantity and / or value per tranche will be pre-set by Exchange and intimated to member from time to time.
- g) Number of tranches for each VWAP instruction cannot exceed 50.
- h) The user can place BUY or SELL VWAP instruction at market price or at limit price. DAY and IOC time validity is allowed.
- i) The trigger price is an optional field. If market touches the Trigger price or become worse, the VWAP instruction will be cancelled.
- j) The total order qty should be entered by the user before setting any tranches.
- k) Tranche level information can be entered in two ways viz: uniform tranches or differential tranches.
- l) **If the user selects the uniform tranches option:**
 - The Start time, End time and Time Gap fields will get enabled.
 - It is mandatory to enter Start time and End time fields if the user selects uniform tranche option.
 - Any one field either number of tranches or time slice (time gap) needs to be entered.
 - No of Tranches should be filled with a number which is in between 1 and 50.
 - If user clicks over Confirm button after entering the above fields, tranches will be generated and quantity will be equally distributed among all the tranches. If there exists any balance quantity, will be adjusted in the last tranche.
 - The time preference of VWAP instruction will be auto modified to Differential Tranche, if user modifies any of the fields of tranches which were generated under Uniform Tranche time preference.
 - After entering all above fields when user presses Submit button, TWS will perform validations for all the fields, if any error occurs then the message will be displayed on the instruction entry screen.

Market VWAP: Instruction VWAP: Traded Quantity: Cancelled Order Quantity: Pending Order Quantity:

p) For additional details member are requested to refer “Help” menu.

3. Order Limits:

- a) Currently a user can set order limits for self through the Order Limits screen which can be invoked from Dialog menu by selecting the option 'Order Limits' (Ctrl+Shift+O). This facility is now made available to corporate manager (CM) to set and view limits for all the users under CM. Similarly the branch manager (BM) shall be able to set and view limits for all users under BM. However, BM will not be able to Set Limits for self.
- b) Order limit in value cannot be more than the User Order Value Limit (UOVL). For existing cases where Order Limits in value is more than UOVL, Order limit in value will be adjusted to UOVL.
- c) Order limits shall enable the user to specify maximum value per order and maximum quantity per order that can be entered.
- d) All market and limit orders shall be validated by the Exchange against the Order Limits of the user.
- e) For updation/inquiry of limits CM/BM needs to select the user id from the drop down list for which the inquiry/updation of limits needs to be done and click the Check Limit button. After updating the limits, CM/BM should click the Set button to save the changes.

The screenshot shows a software window titled "Order Limits". Inside, there's a tabbed interface with "Order Limits" and "MPP". The "Order Limits" tab is active, showing radio buttons for "CM" (selected) and "FO". Below these is a "User ID" dropdown menu currently showing "274" and a "Check Limits" button. A sub-section titled "Order Limits" contains two text input fields: "Order Value (in lacs)" with the value "20.00" and "Order Quantity" with the value "25000". There is also an "Unlimited" checkbox which is unchecked, and a "Set" button. At the bottom of the window are three buttons: "OK", "Cancel", and "Apply".

- f) Once the limit is set by CM / BM, the dealer will only be able to enquire the order limits

ANNEXURE – 3

Changes in existing functionalities (NEAT & NEATPlus access through NEATPro)

1. Addition of new indices in Index Trading functionality

- a) Currently, Index Trading functionality is available for S&P CNX Nifty, CNX IT, Bank Nifty & Nifty Midcap 50 Index only.
- b) Additionally index trading will be available in CNX PSE & CNX Infra index also.

2. Changes in TWAP functionality

- a) A facility is introduced to round off the quantity of the last tranche in existing TWAP functionality.
- b) If quantity per tranche calculated is not integer value, then the TWAP instruction will not get rejected but the balance quantity will be adjusted in the last tranche.
- c) Each tranche will be check for least of quantity / value instead of existing minimum quantity only. The Exchange will pre-set the value / quantity and intimated to member from time to time.

ANNEXURE – 4

VWAP report for members

- The member shall be provided with a separate report at the end of the day containing the details of VWAP instruction.
- The report shall be downloaded in "Onlinebackup" folder of member on extranet
- The file nomenclature is VWAPReport_<membercode>_<ddMmmmyy>.csv
- The file format is given below:

SL no	Field Name	Format
1	VWAP ID	Number
2	Instruction entry time	HH:MI:SS
3	Instruction type (DAY/IOC)	Alphabets
4	Symbol	Alpha numeric
5	Series	Alpha numeric
6	Book Type	Alphabets
7	Start time	HH:MI:SS
8	End Time	HH:MI:SS
9	Buy/Sell Indicator	Alphabets
10	Quantity	Numeric
11	Disclosed quantity (%)	Numeric
12	No of tranches	Numeric
13	Price	Numeric
14	Trigger Price	Numeric
15	PRO/CLI flag	Alphabets
16	Client ID	Alpha numeric
17	Participant ID	Alpha numeric
18	User ID	Numeric
19	Branch ID	Numeric
20	Status	Executed / Cancelled
21	Status Time	HH:MI:SS

Installation procedure for NEAT CM (Version 9.17.00)

Precautions:

- Members are advised to install the new version only after end of live trading hours and after all end of day activities have been completed on Friday, November 25, 2011.
- Members are advised to take back up of all report files before upgrading the software.
- Members are advised to take back up of client master through client master maintenance.
- Members are advised to take back up of debarred client master through debarred client master maintenance
- Members who wish to retain their existing market watch screen are advised to take backup of the files 'mw****.dat' (**** = userid). This file can be found at 'NTNSECM\BACKUP' directory on the log drive.
- **Members are advised to use cmneattdr.bat for installing the new NEAT exe.**

Installation:

- Installation files shall be available after 17:00 hrs on Friday, November 25, 2011.
- Installation files can be taken from path /common/NEAT917 on NSE EXTRANET or internet <ftp://203.199.75.110>
- Download the files NTRELTDR.9.1.7 & cmneattdr.bat into (C :) in your local hard disk
- Go to MSDOS prompt
- Execute command - cd C:\
- Type **cmneattdr.bat** and press "enter"
- Set up the NEATCM icon on the Desk top and click on the icon.

Updating the new version with latest data:

- Download following files from NSE EXTRANET path /common/NTNEAT onto (C :) in your local hard disk:
 1. participant.gz
 2. security.gz
 3. contract.gz
 4. FreeFloat.txt
- Unzip the above files

From the log on screen click on the “LOAD DB” button to update the security and participant details

ANNEXURE – 6

Precautions and procedure for reverting to earlier version

These instructions are required to be followed to ensure that members are able to revert back to old version of NEAT CM & NEAT Plus and trade efficiently from Monday, November 28, 2011 in an unfortunate event of the mock being declared unsuccessful.

Steps to be followed for reverting to old version of NEAT CM:

- Installation files for old version can be taken from path (/common/NEAT916) on NSE EXTRANET or internet <ftp://203.199.75.110>
- Download the files cmneattdr.bat & ntreltdr.9.1.6 into (C :) in your local hard disk, if prompted, choose to overwrite the existing files
- Rename the existing NTNSECM directory
- Go to MSDOS prompt
- Execute command: cd C:\
- Type: **cmneattdr.bat** and press "enter"
- Set up the NEATCM icon on the Desk top and click on the icon.
- Place the old 'mw****.dat' (****=user id) file in 'C:\NTNSECM\BACKUP' directory.
- **Download the latest security.gz, participant.gz, FreeFloat.txt and contract.gz file from NSE EXTRANET path /common/ntneat and unzip it on your log on drive (this step is very important to ensure trading on Monday, November 28, 2011)**
- From the log on screen click the "LOAD DB" button to update the security and participant details.

Steps to be followed for reverting to old version of NEATPlus:

- Download the setup file for old version 'NEATPlusTWSSetup.exe' from NSE EXTRANET path faoftp/faocommon/NEATPlus702 to your local hard disk drive (C:). If prompted, choose to overwrite the existing file.
- Double click on NEATPlusTWSSetup.exe to run the installer.
- Select the same drive from which the earlier version was un-installed. Click on 'Install' button on this pop up window and follow the installation instructions.
- Download and unzip the fresh contract.gz, spd_contract.gz, fo_participant.gz, and security.gz file from NSE EXTRANET path /faoftp/faocommon and upload them on your log on drive (this step is very important to ensure trading on Monday, November 28, 2011)
- Restore the backup of Market Watch, Client Master and Debarred Client Master.
