Hours of operation

Our hours of operation coincide with the global financial markets. Trading is available from Sunday 10pm to Friday 10pm (GMT).

Create account

Demo account

Please note: these times are subject to change during daylight saving time and certain public holidays. There may be occasions within market hours when trading may be halted

1

Existing and new positions

You cannot close existing positions or open new positions when the markets are closed. You can, however, place or modify entry, stop-loss, guaranteed stop-loss, take-profit and trailing stop orders.

2

Widening spreads

Spreads (the difference between the bid price and ask price) typically widen before the markets close and could trigger orders and/or margin closeouts.

Market prices

Market prices may significantly change or "gap" when the market resumes trading. This change could trigger orders, which would be executed at the prevailing market rate. For example, if a price moves against you, a stop-loss order may be triggered at a different price to the price specified on your order. This could result in additional losses.

Note

Ensure that you maintain sufficient margin in your OANDA Trade account at all times to avoid a margin closeout. To reduce the risk of a margin closeout, you could reduce or close your overall positions or add more funds to your OANDA Trade account. To prevent unwanted order execution, consider widening your take-profits, stop-losses or trailing-stops prior to the market close.

Forex CFDs

Instrument	Timezone of exchange	1 Standard lot equivalent (units)	Trading hours (local exchange time)
All FX products (except TRY Pairs)	New York	100,000	Sun-Fri: 17:05 - 16:59*
TRY Pairs	Central Europe	100,000	Mon-Fri: 08:00 - 17:00

*Forex instruments open on Sunday at 17:05 and close for the week on Friday 16:59 (New York time). There will be a six minute break between 16:59 - 17:05.

Note: There is an additional 6-minute break for NZD pairs starting at 06:59 Auckland time.

OANDA SMARTER TRADING

Create account

You should consider whether you understand how CFDs work and whether you can afford to take the high risk of losing your money.
