Section 2 - Compliance with Core Principles

The Exchange has reviewed the designated contract market core principles (“DCM Core Principles”) as set forth in the Commodity Exchange Act (“CEA” or “Act”) and identified that the following DCM Core Principles may be impacted as follows:

Core Principle 2 – Compliance with Rules

Trading in the Contracts shall be subject to CME Rulebook Chapter 4, which includes prohibitions against fraudulent, noncompetitive, unfair, and abusive practices. Additionally, trading in this Contracts shall be subject to the Exchange’s trade practice rules. Trading activity in this Contracts shall be subject to monitoring and surveillance by CME Group’s Market Regulation Department, which has the authority to exercise its investigatory and enforcement power where potential rule violations are identified.

Core Principle 3 – Contracts Not Readily Subject to Manipulation

The underlying reference rates (AVAXUSD_RR, SUIUSD_RR) are not readily subject to manipulation. The reference rates are calculated from a large number of trades observed during the calculation window used by CF Benchmarks. The combination of volume weighting of medians and non-weighted partitions prevents manipulation in the reference rate. Ultimately, influencing the reference rate would require significant trading activity on several exchanges over an extended period of time.

The Reference Rate is calculated and administered by CF Benchmarks (registered with the European Securities and Markets Authority as a benchmark administrator in accordance with Article 34 of the EU Benchmarks Regulation) under the regulatory supervision of the UK Financial Conduct Authority.

Core Principle 4 – Prevention of Market Disruption

Trading in the Contracts will be subject to CME Rulebook Chapters 4 and 7, which include prohibitions on manipulation, price distortion, and disruption to the expiration and assignment process. Trading activity in the Contracts will be subject to monitoring and surveillance by the Exchange’s Market Regulation Department.

Core Principle 5 – Position Limitations or Accountability

Contract	Spot Month Position Limit (Effective close of business three business days prior to expiration)	Single Month Accountability Level	All Month Accountability Level
AVAX Futures	1,000	5,000	5,000
SUI Futures	1,000	5,000	5,000

Positions for the Micro counterparts will be aggregated with their respective contract, at the applicable ratio given the differing notional values.

The position limits for the Contracts are consistent with the Commission’s guidance.

Core Principle 7 – Availability of General Information

The Exchange shall disseminate a Special Executive Report (“SER”) that sets forth information regarding the Contracts. In addition, the SER will be available on the Exchange’s website.

Core Principle 8 – Daily Publication of Trading Information

The Exchange shall publish the Contracts’ trading volumes, open interest levels, and price information daily on its website and through quote vendors.

Core Principle 9 – Execution of Transactions

The Contracts shall be listed for trading on CME Globex, which provides for efficient, competitive, and open execution of transactions. Additionally, CME Globex affords the benefits of reliability and global connectivity.

Core Principle 10 – Trade Information

All requisite trade information shall be included in the audit trail and will suffice for the Market Regulation Department to monitor for market abuse.

Core Principle 11 – Financial Integrity of Transactions

The Contracts shall be cleared by CME Clearing, which is registered with the Commission as a derivatives clearing organization, and which is subject to all CFTC regulations related thereto.

Core Principle 12 – Protection of Markets and Market Participants

CME Rulebook Chapters 4 and 5 set forth multiple strictures that preclude intermediaries from disadvantaging their customers. These Rules apply to trading in all of the Exchange's competitive trading venues and will apply to transactions in the Contracts.

Core Principle 13 – Disciplinary Procedures

CME Rulebook Chapter 4 provides for the Exchange to discipline, suspend, or expel members or market participants who violate the rules of the Exchange. Trading in the Contracts shall be subject to these provisions. The Exchange's Market Regulation Department has the authority to exercise its powers of enforcement, in the event that rule violations in this product are identified.

Core Principle 14 – Dispute Resolution

Disputes in respect of the Contracts shall be subject to the arbitration provisions set forth in CME Rulebook Chapter 6, which allow all nonmembers to submit to arbitration claims for financial loss resulting from transactions on the Exchange. Pursuant to these provisions, any member named as a respondent in any such claim submitted by a nonmember is required to participate in arbitration proceedings. Additionally, the Exchange requires members to resolve via arbitration all disputes concerning transactions on the Exchange.

Daily Settlement Procedure Documents

SUI Futures

Normal Daily Settlement Procedure

CME Group determines the daily settlements for SUI Futures (SUI) based on CME Globex trading activity between 14:59:00 and 15:00:00 Central Time (CT), the settlement period.

Lead Month

The lead month is the anchor leg for settlements and the contract expected to be the most active.

Tier 1: If the lead month contract trades on CME Globex between 14:59:00 and 15:00:00 Central Time (CT), the settlement period, then the lead month settles to the Volume-Weighted Average Price (VWAP) of the trade(s) during this period.

Tier 2: If no trades in the lead month occur between 14:59:00 and 15:00:00 CT, the contract month settles to the midpoint of the Bid/Ask between 14:59:00 to 15:00:00 CT, the settlement period.

Tier 3: If a two sided market is not available on CME Globex during the closing period, the reference rate will be used in the following Carry calculation to derive a settlement price.

Reference Rate + [(Days to expiration/ 365) x Interest rate x Reference Rate]

Second Month

When the lead month is the expiry month, the second month is defined as the calendar month immediately following the lead month. When the lead month is not the expiry month, the second month is defined as the first expiring non-lead month.

Tier 1: If the lead month-second month spread trades on CME Globex between 14:59:00 and 15:00:00 CT, the spread VWAP is calculated, rounded to the spread's nearest tradable tick and then applied to the lead month settle to derive the second month settle.

Tier 2: If there are no spread trades on CME Globex between 14:59:00 and 15:00:00 CT, the last spread trade price is applied to the lead month settle to derive the second month settle. If the last spread trade is outside of the spread's Bid/ Ask, the bid or ask price that is closer to the last spread trade is applied to the lead month settle to derive the second month settle.

Tier 3: If there is no spread market information available on CME Globex, the reference rate will be used in the following Carry calculation to derive a settlement price.

Reference Rate + [(Days to expiration/ 365) x Interest rate x Reference Rate]

Back Months

To derive settlements for all remaining months, the following Carry calculation will be used to derive settlement prices provided that this value does not violate the bid or ask between 14:59:00 and 15:00:00 CT for the respective outrights.

Reference Rate + [(Days to expiration/ 365) x Interest rate x Reference Rate]

Micro SUI Futures

Normal Daily Settlement Procedure

The daily settlements in the Micro SUI Futures (MSU) contracts are derived directly from settlements in the SUI futures (SUI) contracts. Daily settlements derived from the SUI will be copied directly to the MSU for each contract listing.

AVAX Futures

Normal Daily Settlement Procedure

CME Group determines the daily settlements for AVAX Futures (AVA) based on CME Globex trading activity between 14:59:00 and 15:00:00 Central Time (CT), the settlement period.

Lead Month

The lead month is the anchor leg for settlements and the contract expected to be the most active.

Tier 1: If the lead month contract trades on CME Globex between 14:59:00 and 15:00:00 Central Time (CT), the settlement period, then the lead month settles to the Volume-Weighted Average Price (VWAP) of the trade(s) during this period.

Tier 2: If no trades in the lead month occur between 14:59:00 and 15:00:00 CT, the contract month settles to the midpoint of the Bid/Ask between 14:59:00 to 15:00:00 CT, the settlement period.

Tier 3: If a two sided market is not available on CME Globex during the closing period, the reference rate will be used in the following Carry calculation to derive a settlement price.

Reference Rate + [(Days to expiration/ 365) x Interest rate x Reference Rate]

Second Month

When the lead month is the expiry month, the second month is defined as the calendar month immediately following the lead month. When the lead month is not the expiry month, the second month is defined as the first expiring non-lead month.

Tier 1: If the lead month-second month spread trades on CME Globex between 14:59:00 and 15:00:00 CT, the spread VWAP is calculated, rounded to the spread's nearest tradable tick and then applied to the lead month settle to derive the second month settle.

Tier 2: If there are no spread trades on CME Globex between 14:59:00 and 15:00:00 CT, the last spread trade price is applied to the lead month settle to derive the second month settle. If the last spread trade is outside of the spread's Bid/ Ask, the bid or ask price that is closer to the last spread trade is applied to the lead month settle to derive the second month settle.

Tier 3: If there is no spread market information available on CME Globex, the reference rate will be used in the following Carry calculation to derive a settlement price.

Reference Rate + [(Days to expiration/ 365) x Interest rate x Reference Rate]

Back Months

To derive settlements for all remaining months, the following Carry calculation will be used to derive settlement prices provided that this value does not violate the bid or ask between 14:59:00 and 15:00:00 CT for the respective outrights.

Reference Rate + [(Days to expiration/ 365) x Interest rate x Reference Rate]

Micro AVAX Futures

Normal Daily Settlement Procedure

The daily settlements in the Micro AVAX Futures (MAV) contracts are derived directly from settlements in the AVAX futures (AVA) contracts. Daily settlements derived from the AVA will be copied directly to the MAV for each contract listing.
