

Market Notice

To: Coinbase Derivatives Clients

From: Derivatives Command Center

Notice: 26-33.3

Date: 09/24/2026

Subject: Amendment to 26-33.2 and 26-25: Rolling Gateway Deploys Postponed and Upcoming Maintenance Windows

Summary

Coinbase Derivatives, LLC ("CDE" or "Exchange") is deferring the rolling gateway deploys during market hours and the removal of the weekly 1-hour Friday maintenance window described in Market Notice 26-33.2 (published 09/10/2026).

This notice amends [Market Notice 26-33.2](#) and [Market Notice 26-25](#) (published 05/20/2026).

Customer Impact

- The weekly 1-hour Friday maintenance window (16:00 to 17:00 CT) remains in effect. CDE deployments will take place during this window.
- The Friday 14:30 CT rolling deploy events listed in Market Notice 26-33.2 are canceled, including Friday, Sept 25, 2026 and all weekly Friday events through GoLive.
- Products in the weekend trading set will keep their current trading hours, including the Friday maintenance window. The TradingSessionID (336) value in FIX Market Data, introduced in Market Notice 26-32, will not change to TRUE_24X7 until the transition is rescheduled.
- The Connectivity Recommendations in Market Notice 26-33.2 (aggregate ports for Internet sessions, ResetSeqNumFlag=Y (Tag 141) on logon, and ExecID-based recovery) remain recommended as safeguards for unplanned service events.
- <https://status.cde.coinbase.com/> is updated before each deployment, during any unexpected issues, and at the conclusion of the deployment.

coinbase DERIVATIVES

Integration (UAT)

The hourly rolling deploys in Integration announced in [Market Notice 26-33.2](#) have been discontinued. To schedule a seamless deploy test in Integration, please contact derivatives@coinbase.com.

Upcoming Maintenance Windows

- Q4: Saturday, October 24, 2026 (aligned with FIA DR test). See [Market Notice 26-37](#) for details.
- Future quarterly maintenance dates will be announced in a subsequent Market Notice.
