 - Order Execution Dashboard
 - Commitment of Traders Report
 - Ex-pit Volumes
- Equities:
 - Select Sector Futures
 - Short-dated Options on Futures

6. Partner Exchanges

- Latin American Partner Exchanges
- Bursa Malaysia Derivatives

7. Quiz & Q&A

Financial Reform Rulemaking

CFTC, SEC, Treasury continue rulemaking to implement Dodd-Frank

CME Group agrees with the core tenets of Dodd-Frank:

- Safety and soundness of central counterparty clearing
- Price transparency
- Liquid markets with low transaction costs
- Market integrity and customer protection

EU & other G20 countries lag behind the U.S. in implementing reforms

Recent agreements on the European Market Infrastructure Regulation (EMIR) & proposals by other countries indicate general alignment with Dodd-Frank

CME Group continues to work with regulators and the industry to ensure that U.S. futures markets are not placed at a disadvantage

US Ahead of EU in Timing of OTC Reforms

CFTC Final Rules

- Ag commodity definitions
- Process to review Swaps for Mandatory Clearing
- Entity process for registered Entities
- SDR standards and principles
- Large Trader Reporting for commodity swaps
- Position limits
- DCO rules and requirements
- Gross margining of futures and swaps
- Foreign Boards of Trade registration
- Standards and registration for Swap Dealers and Major Swap Participants

2011

2012

EU Final Rules

- EU Financial Services Legislation to take place through 2012-2013
- EMIR covers clearing/trade repositories and MIFID/MIFIR covers trade execution
- Mandatory clearing and CCP rules
- Customer fund segregation
- Position limits and HFT
- Capital Rules for CCP exposure
- Access to benchmarks

2013

EU Implementation

- Trade execution
- Capital Rules for CCP exposure
- Market abuse rules
- Position limits?
- Transaction tax?

2014

U.S. Implementation

- Mandatory Clearing and Execution Begins
- Rolling/ongoing designation of swaps to be mandatorily cleared
- Swaps customer segregation
- Capital and margin
- FSOC rules for SIDCO

EU Implementation

- Trade reporting required
- Mandatory clearing of swaps
- ESMA determines which swaps must be cleared
- National authorities approve and regulate CCPs

Key Dodd-Frank Issues

Issue	Status	Implications
Phasing of OTC Clearing	Proposed: Potential for mandated clearing to begin in fall of 2012	<i>Appropriate phasing will facilitate buy side and sell side clearing</i>
Centralized Trading Requirement	Proposed: Final rule expected in coming months	<i>Could limit innovation & reclassification of some products & increase costs due to higher margins for swaps</i>
Disruptive Trading Practices	Final Interpretive Order: effective	Prohibits certain disruptive trading practices—creates legal & other uncertainty related to CFTC enforcement
Position Limits	Final: effective date dependent on swap definition	Aggregate limits to be set by CFTC for physical commodities
Protection of Swaps Customer Collateral	Final Rule: effective 11/8/12	Legal Segregation Operationally Comingled (LSOC) adopted for swaps
Margin Requirements	Final Rule: effective 5/7/12	Higher margins for cleared financial swaps relative to cleared futures

Looking Ahead

- **US:**

- CFTC, other regulators to adopt final rules over next several months with phased implementation for clearing and other requirements likely
- Legislative proposals to amend Dodd-Frank will likely continue, however, divided congress and election year complicate passage of such proposals
- Transaction tax proposals persist, but have yet to gain broad political support

- **Europe:**

- ESMA to begin developing technical standards for derivatives infrastructure (EMIR) and European Parliament and Commission to finalize trading, HFT, and other reforms in MiFID

Agenda

1. Update on Regulatory Reform

2. Update on OTC Initiatives

- Products
- OTC Solutions: CME ConfirmHub, CME ClearPort

3. CME Clearing Europe

4. e-Trading Updates

- Globex Performance Enhancements
- Global Network Update
- NY DR Datacenter/Disaster Recovery
- CME Co-Location Services
- Market Data for OTC Products
- Firm Administrator Dashboard
- Risk Management Tools

Agenda, *continued*

5. New or Recently Launched Products

- Metals:
 - Coil Options
 - Copper Calendar Swaps & Average Price Options
- Energy:
 - Thermal Coal
 - Crude & Refined products
 - Natural Gas
- Interest Rates:
 - Product Expansion
 - Economic Trends
 - Margining Efficiencies
- FX:
 - Order Execution Dashboard
 - Commitment of Traders Report
 - Ex-pit Volumes
- Equities:
 - Select Sector Futures
 - Short-dated Options on Futures

6. Partner Exchanges

- Latin American Partner Exchanges
- Bursa Malaysia Derivatives

7. Quiz & Q&A

CME Group OTC Clearing

Overview and Background

- CME Group has worked closely with buy side and sell side participants to build a multi-asset class, market leading OTC clearing solution
- Over \$410 billion in notional has cleared since launch and open interest is over \$236 billion
- Successful new product launches of EUR IRS which has cleared over €79.3 billion since launch, GBP IRS which has cleared over £8.7 billion since December 5th, CAD IRS which has cleared \$117.2M since December 5th, and the CDX HY Indices which have cleared over \$10.0 billion since November 7th
- 1300 active customer accounts with cleared trades, and an additional 2,500 customer accounts testing through our 16 clearing firms

Benefits of the Solution

- Allows the unique opportunity to offer unparalleled capital efficiencies via margin offsets of IRS positions against Eurodollar and Treasury Futures
- Builds on the strength of CME Group's market leading interest rate products business, which had an average daily volume of \$3.6 trillion in 2011, and over \$28 trillion of notional outstanding
- Provides customers full transparency through direct access to daily valuation reports and the CME CORE margin tool
- Operational flexibility of a multi-asset class solution for IRS, CDS, FX, and Commodities via one clearinghouse
- Protects the confidentiality of trading relationships, while enabling customers to terminate positions with any market participant

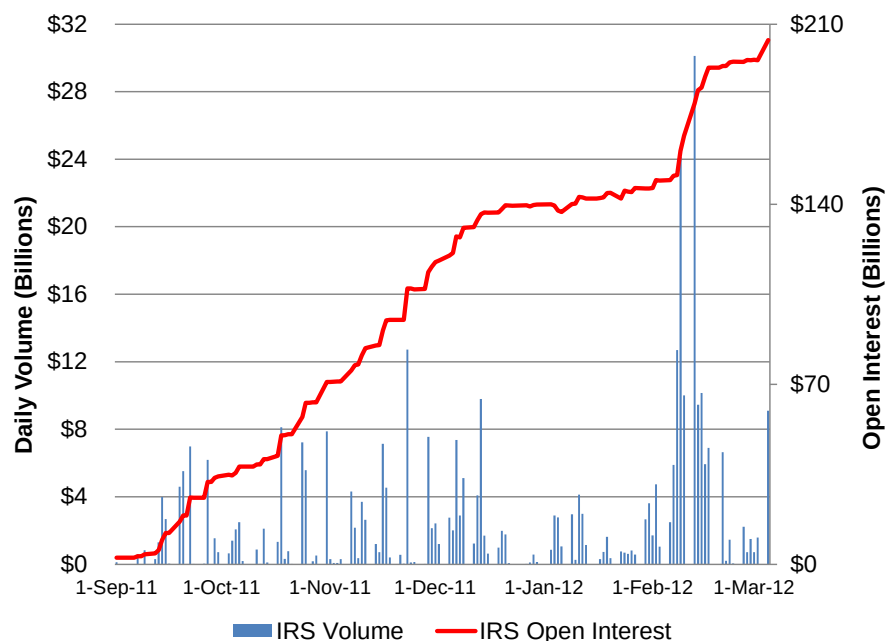

Record Customer Clearing Activity

CME Group has built the leading OTC IRS and CDS clearing service by U.S. customer volume

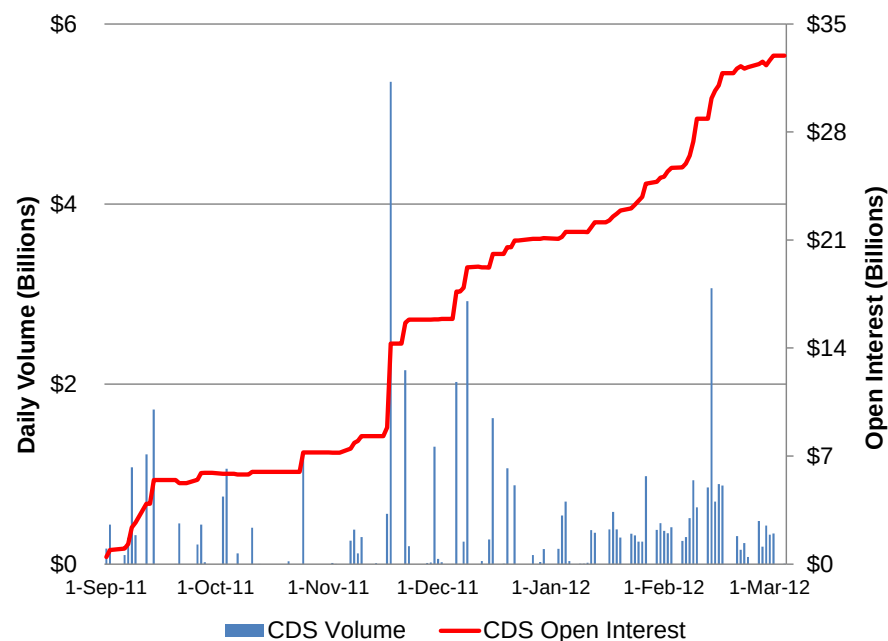

Interest Rate Swaps

- Total Volume Cleared = \$360.0 billion
- Open Interest = \$203.8 billion

Credit Default Swaps

- Total Volume Cleared = \$50.2 billion
- Open Interest = \$32.9 billion

Strong Performance of Newly Launched Products

- EUR IRS cleared €79.3 billion since it launched on October 17th
- GBP IRS cleared £8.7 billion since it launched on December 5th
- CDX High Yield Indices have cleared \$10.0 billion since they launched on November 7th

Note: Data current as of 3/5/12

Cleared OTC Financial Products

CME Group is delivering a comprehensive global product scope across IRS, CDS, and FX

Existing Products

- USD, GBP, EUR Interest Rate Swaps (IRS) out to 50 years; CAD out to 30 years
- CDX IG Index, Series 9-17 – 3, 5, 7, and 10 year tenors as applicable
- CDX HY Index, Series 11-17, 5 year tenor

Early 2012 Expansion

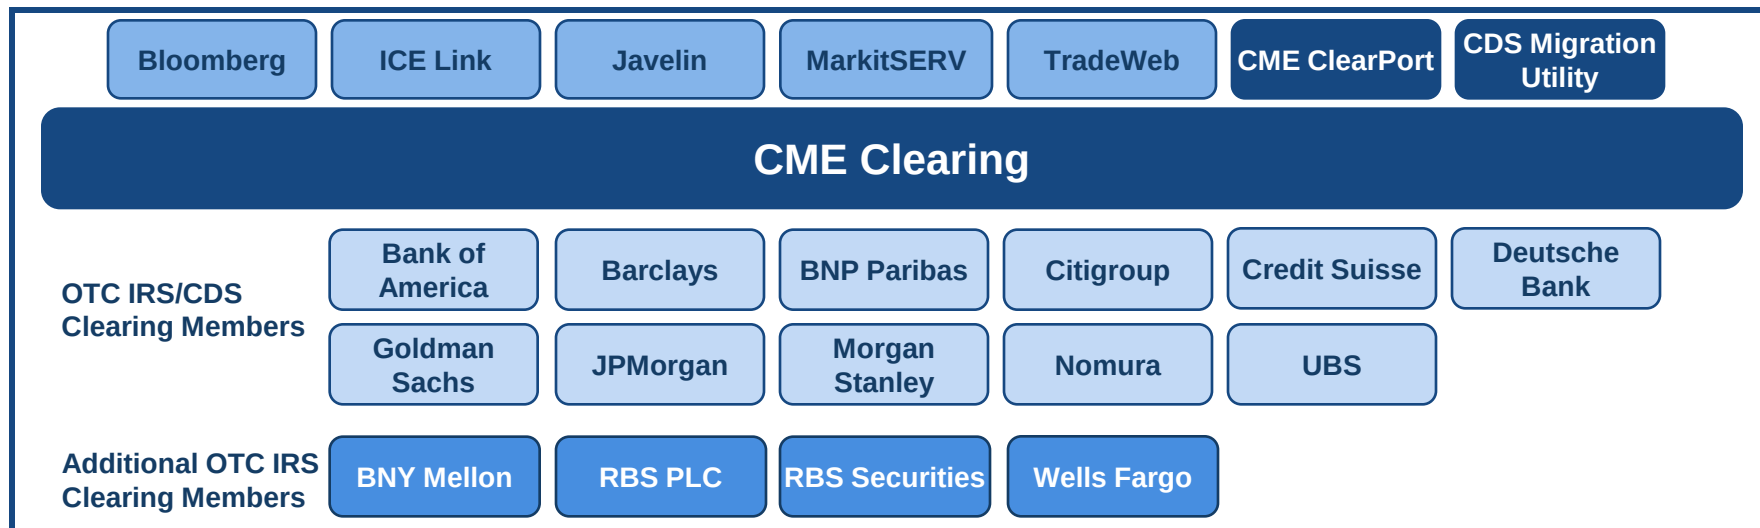

- IRS in JPY, CHF, and AUD out to 30 years
- CDS single names of index constituents
- USD Non-Deliverable Forwards (NDFs) in BRL, CNY

Other Future Product Expansions

- IRS in SEK, NOK, DKK, HKD, and NZD
- Zero Coupon Swaps, Amortizing Swaps, Basis Swaps, FRAs, and OIS
- Interest Rate Swaptions
- Additional CDS single names
- USD Non-Deliverable Forwards (NDFs) in KRW, INR, MYR, PHP, IDR, TWD, CLP, COP, RUB, PEN
- Cash Settled Forwards in AUDUSD, USDCHF, USDCAD, NZDUSD, USDNOK, USDSEK, USDDKK, EURUSD, USDJPY, GBPUSD, USDMXN, USDSGD, USDPLN, USDZAR, AUDJPY, EURAUD, CADJPY, EURGBP, EURJPY, EURCHF, USDCZK, USDHUF, USDTRY, USDILS, USDTHB, USDHKD
- Deliverable FX Spot, Forwards, Swaps and Options; Non-Deliverable Options (NDOs)

Open Access Clearing Solution

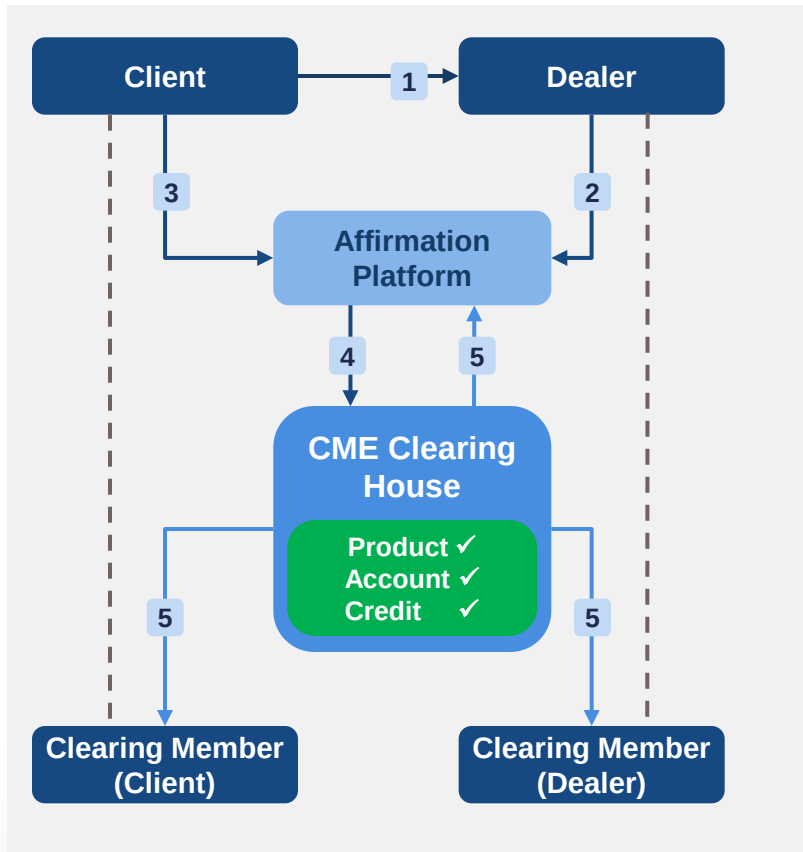

Several market leading affirmation platforms and Swap Execution Facilities have already connected directly to CME Clearing

- Negotiate, execute, and submit trades through multiple venues to CME Clearing
- Straight through processing and real-time confirmation once the trade is cleared
- Protects the confidentiality of trading relationships, while enabling customers to terminate positions with any market participant
- Operational flexibility of a multi asset class solution for IRS, CDS, FX, and Commodities via one clearinghouse

Trade Workflow Mechanics

Straight Through Processing allows for real-time clearing and trade confirmations

1 – Dealer and Client agree to trade

2 – Dealer alleges swap to Client through the Affirmation Platform

3 – Client selects Clearing Member and verifies the swap through the Affirmation Platform

4 – Affirmation Platform sends the matched trade between Dealer and Client to CME Clearing House

5 – CME checks for validation of the product, account and applies credit limits set by Clearing member(s), and then accepts the swap for clearing

5 – CME sends "Cleared" notification back to the Affirmation Platform which displays the "Cleared" Status to each party

5 – CME sends a Clearing Confirmation to Clearing Member(s) once all is validated

Customer On-boarding Resources

CME CORE Margin Tool

- Web-based margin tool that enables customers to generate initial margins for IRS and CDS portfolios
- CME CORE can be accessed by doing the following:
 - Create a CME SMART Click ID at <https://cmecore.cmegroup.com/span/>
 - Once a SMART Click ID is attained, please email cme.core@cmegroup.com to request entitlements to CME CORE. Specifically, in an email please provide the user ID and specify the request for the IRS/CDS asset classes.
 - Please ensure your desktop is equipped with a recent version of Microsoft Silverlight (MS Add On): <http://www.microsoft.com/getsilverlight/Get-Started/Install/Default.aspx>

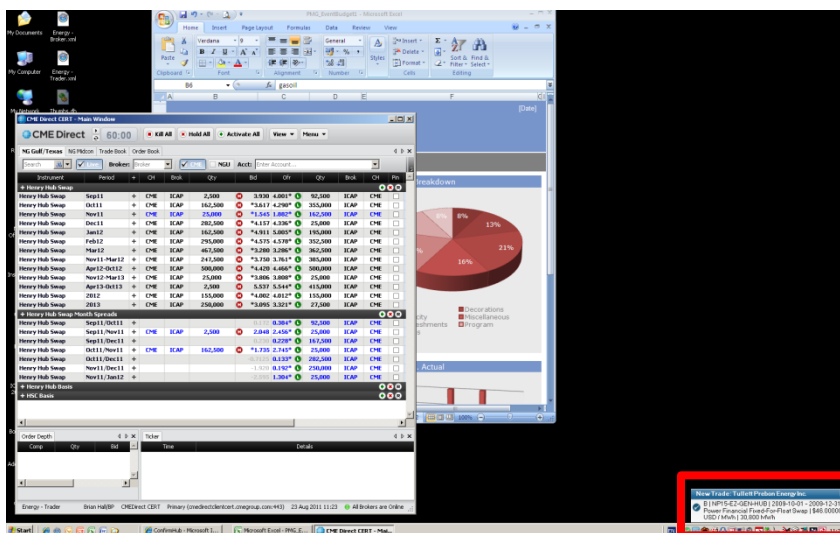

CME On-boarding Team

- Team of on-boarding experts who work with buy side clients to help them prepare to clear IRS and CDS, and engage in testing the clearing process
- Extensive work with the affirmation platforms, and ability to connect customers to the right resources at those firms
- The team can be reached at (312) 338-7112 and onboarding@cmegroup.com

CME ConfirmHub

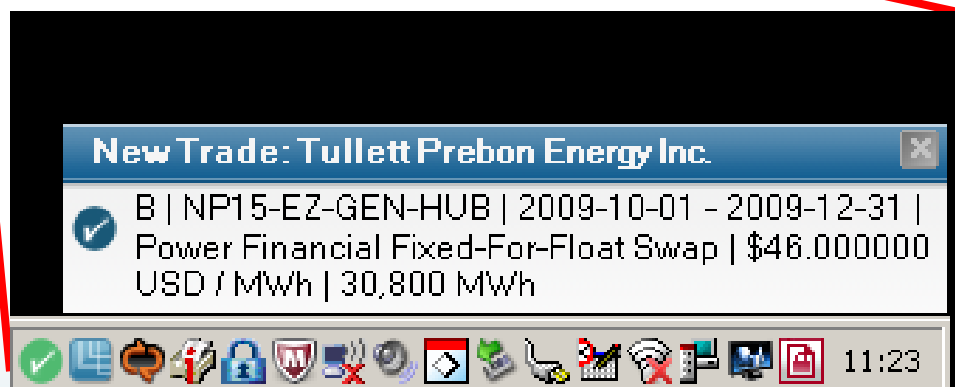

- **Front Office STP** - Real-time trade flow to the trader's desktop or risk management system
- **Back Office Trade Management** – Trade reporting and workflow management with brokers
- **Broker Confirmations** – Standardized broker confirmations with broker fees

CME ConfirmHub Front Office STP - *LiveBlotter*

LiveBlotter toolbar application shows new, alleged trades with a popup, much like MS Outlook mail.

 - Commitment of Traders Report
 - Ex-pit Volumes
- Equities:
 - Select Sector Futures
 - Short-dated Options on Futures

6. Partner Exchanges

- Latin American Partner Exchanges
- Bursa Malaysia Derivatives

7. Quiz & Q&A

CME Clearing Europe: Solid growth of Volume and Open Interest and a strong start into 2012

- Consistent build out of volumes and open interest over Q3/Q4 '11 and in early '12
- Volume build outs confirm that CME Clearing Europe is a way for CME Group to deliver CME products to clients outside of the US who have a strong preference to clear in Europe
- January has been strongest month so far; highest daily volume record with 1,306 contracts
- YTD 2012 CME Clearing Europe has already cleared more than 90% of total '11 volumes
- Open Interest (end of Jan) had an aggregate nominal value of \$ 545M

CME Clearing Europe will further deepen its OTC Commodity Offering throughout 2012

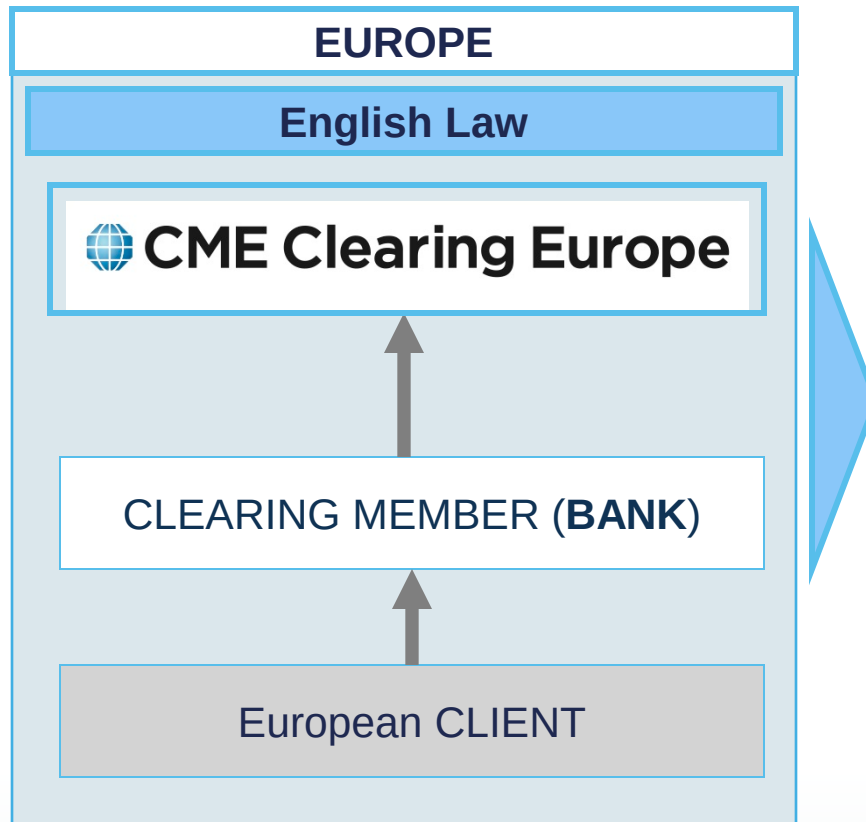

1 Existing OTC Commodity Suite: Energy, Agricultural, Freight & Metals

Crude Oil Outrights	Refined ProdOptions	Petrochemicals	Ethanol
Crude Oil Spreads	Natural Gas Options	Refined Prod Spreads	Freight Swaps
Crude Oil Options	Natural Gas Swaps	BioFuel Swaps	Freight Forwards
OTC contracts based on DME Oman crude oil futures contract		OTC derivative contract based on rapeseed oil prices	

2 Continuous Expansion of Product Offering & Innovation

- More than 130 client and broker entities connected via CME ClearPort, 13 clearing firms, additional firms in the pipeline
- Clearing more than 180 OTC Energy, Agricultural and Freight derivative products
- Expanded into OTC precious metals with London Gold Forwards as first product
- Launched London Gold Forwards on 30 Jan '12
- Launched Offering first cleared European Wood Pellet Swap on 27 Feb '12

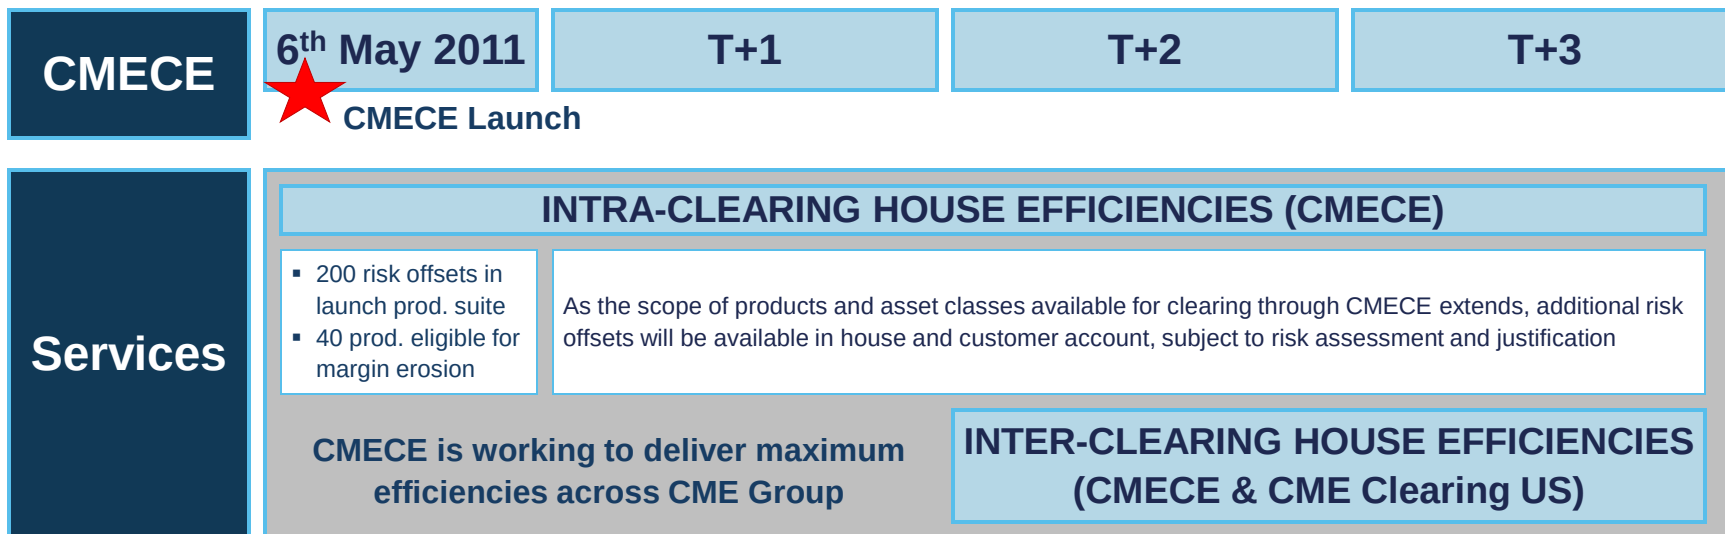

Expansion into OTC Financials, IRS and FX, is key priority for CME Clearing Europe in 2012

Launching OTC IRS and FX

- CME Group's Global Clearing Capabilities are built to accommodate clients' regional clearing preference
- CME Clearing Europe is bringing CME's US offering into a European legal and jurisdictional environment; whilst using the same operational workflows and approach to risk management
- English Law Environment for segregation, asset protection and portability of client collateral and positions
- Capital usage efficiencies between OTC interest rate and FX products

CME Group's clearing houses are focusing on delivering efficiencies across CME Group

- CME Clearing Europe and CME US are currently working on providing cross margining benefits for clearing members of both clearing houses
- The objective is the provision of significant capital usage efficiencies
- Ultimate scope is all asset classes

Agenda

1. Update on Regulatory Reform

2. Update on OTC Initiatives

- Products
- OTC Solutions: CME ConfirmHub, CME ClearPort

3. CME Clearing Europe

4. e-Trading Updates

- Globex Performance Enhancements

7. Quiz & Q&A

CME Globex Performance Enhancements

Significant CME Globex Architecture Changes planned for Q3 2012

- Application and infrastructure redesign
- All engines, all products (except Partner Exchange order routing markets)
- iLink and FIX/FAST performance improvements

iLink: Enhanced Performance and Reduced Variability

- Targeting sub-millisecond median roundtrip times
- Reduced variability across sessions and throughout the trading day

FIX/FAST: Enhanced Performance and Bandwidth Impacts

- Reduced latency on FIX/FAST market data
- Bandwidth impacts will be communicated via the CME Globex Notices

CME Globex Performance Enhancements

Migration Strategy

- Details will be communicated via the CME Globex Notices
- New Source IPs for FIX/FAST MDP channels
- Several mock trading sessions will be offered
 - Connect to and trade on the new architecture
 - Peak production data replay
- iLink Early Adopters Launch
 - All customers are eligible to participate
 - Early adopters will get new IPs and ports for existing sessions to connect to new architecture
 - Risk management considerations during early adopter phase
 - Strongly recommend customers move only a subset of iLink sessions to the new architecture during the early adopters phase

CME Globex Performance Enhancements

Future Outlook

- Further network re-structuring is anticipated
- Exploring emerging technologies and next generation hardware
 - Hardware acceleration
 - Additional feed granularity
 - Microsecond measurements and beyond...

Stay Tuned

- The Client Impact Assessment will be published in May
- Further updates will be provided in the CME Globex Notices

Global Network Update

CME Group is re-engineering its global infrastructure to accommodate recent and potential future growth initiatives

- Implement a high capacity, high availability, low latency, multi-purpose Global Backbone with a target Q1 2013 completion.
- Completion of Global Backbone provides customers with business continuity via International and NY hub locations
- Migrate existing hubs to connect to new Global Backbone
 - London in process
 - NY/NJ in process
 - Singapore, Kuala Lumpur & Seoul – September, 2012
- Deploy additional Hong Kong hub
 - Target Q4 2012 launch
 - Q3: Data center locations shared with customers
 - Customers can submit CME legal paperwork
 - Demarcation information shared with customers – end of Q3

Global Network Update

Status of initiatives to support CME's Global Backbone:

London:

- All customers have been contacted by CME Global Account Management
- Customers can order up to 1Gb copper hand-off to our new locations
- Interoute (suite within the Docklands Global Switch facility):
 - Customers located in the Pinnacle House location have been provided new demarc to order new circuits to this new location
- Verizon:
 - Customer using Verizon as their telecommunications provider are working with their Verizon rep to move their circuits to CME Group's new space within the existing data center
 - Target completion – September 28, 2012

United States: New Points of Presence (POPs) in NY & NJ:

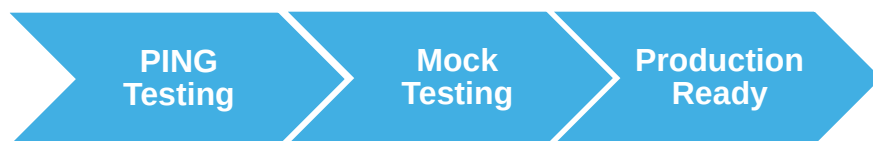

- **CME E-Connect**, a client managed offering, available
- Customers remaining on the CME-managed solution have migrated to CME's new infrastructure or are working with CME to complete their migration:
 - Either new circuits or a logical circuit move to our new infrastructure will occur
- Target completion – June 30, 2012

CMEG's NY Data Center / Disaster Recovery Update

- Protects against operational, facility and environmental risk
- Adds another layer of protection to CMEG's Business Continuity strategy
- Provides Chicago-based customers with geographical diversification by using a back up VPN
 - CME has added a connectivity option – CME NYDR VPN at no cost to the customer
- All other connections outside of the Chicago area will reroute to CME's NY/NJ POP

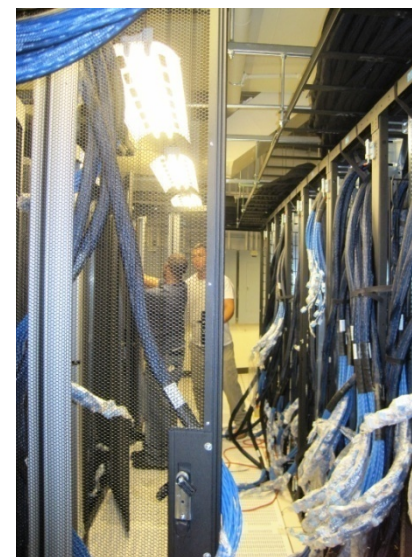

Customer “Verification” Activities:

- PING Tests (2/4 and 3/10)
- Mock Testing (Q3 2012)
- By the end of 2012, the NY Data Center will be fully functional

Additional Annual Exercises:

- Disaster Recovery exercises are being held:
 - Globex – August 4th
 - Clearing – October 27th
 - For scope, registration and support details please reference www.cmegroup.com/globexdr

Any Business Continuity or Disaster Recovery questions should be directed to BCM@cmegroup.com or your GAM.

CME Co-Location Business Update

- **January 29, 2012 – Live Trading Launched out of Co-Location facility**
 - Customers are seeing expected latency savings on the network
- 80% of Phase 1 capacity has been reserved
- 100+ Customers have signed up globally
- CFTC rules on co-location are still pending
- 12 Telecommunication Providers are providing carrier services
- **Service Provider Partner Program** launched on January 11th, 2012
 - 16 Service Providers participating
 - Market data, News Feed, Software, Hosting, Connectivity, and Managed Services

Who is Onboard?

Market Data Update: OTC Products Support

- **Settlements for new CME cleared “Pure OTC” products**
 - End Q1 2012 launch of CME CDS cleared OTC settlements in Streamlined FIX/FAST format, channel 170
 - Channelization by asset class
 - Balance of all pure OTC settlements delivered over 2012
 - Data will include product level price, volume, open interest and reference data
- **Transactional Data**
 - Block trades for CME listed future & options moving to streamlined FIX/FAST in 2012 (replacing ITC2)
 - Technical readiness to handle SEF trades & quotes (channelized by OTC execution venue)
 - Channels will be comprised of a single incremental feed with the message broken into a product key and product information followed by trade price

Market Data Initiatives: CME DataCloud

An 'On-demand' web services offering for access to CME settlement and partner market data

With DataCloud; distributors, vendors and customers will:

- Reduce time & cost to access data
- Eliminate data management
- Get pinpoint, on-demand access to just the data you need
- Convenient developer-friendly services

For More Information:

datacloud@cmegroup.com

www.cmedatacloud.com

Available Now:

- CME CDS OTC Settlements, Vol & Open Interest
- OTC Global Nat Gas and Crude trades & quotes

May 2012:

- CME IRS OTC Curves, Volume & Open Interest
- CME Listed Futures & Options Settlements, Volume & Open Interest

Interest Rates Swap Futures. NEW Data. NEW levels of market transparency.

- Flexible futures that embed the cash flows of OTC interest rate swaps, traded on Eris Exchange and cleared by CME Clearing
- Streaming, real-time central limit order book trading in benchmark USD-denominated products
 - Spot-Starting Swap Futures: 2, 5, 10 year tenors
 - Forward-Starting Swap Futures: IMM dates with fixed coupons, and invoice spread legs

CME Firm Administrator Dashboard (FADB)

Launched in 2009, the FADB allows clearing member firms and customers to efficiently access information relating to CME Globex and Clearing services.

- In 2010, FADB enables clearing firm administrators to self-service iLink Cancel on Disconnect (COD)
 - Eliminated paper-based process to enable/disable COD
- In 2011, FADB enhanced for executing firm level user access
 - Allows executing firm users to view contact and iLink session information
- Enhancements planned for 2012 include:
 - iLink session capacity & performance metrics
 - T+1 executing firm Messaging Efficiency Program statistics
 - Administrative support for Messaging Efficiency Program report contacts
 - Messaging Efficiency Program Request for Waiver (RFWs)
 - Back-office manager report revisions

Contact your Global Account Manager for more information

CME Group Risk Management Tools

Globex Credit Controls (GC2) update

- **Coming in July 2012: Mid-week adds**
 - Currently GC2 limits for Globex Execution Firms created mid-week take affect on Sunday prior to market open
 - Clearing firms will have the ability to apply credit controls to Globex Execution Firms that have been newly created or transferred during the week.

CME Group Risk Management Tools

Risk Management Interface (RMI)

On April 1st, CME Group will introduce the Risk Management Interface (RMI), an API and GUI that support granular, pre-trade risk management for Clearing Firms. RMI consists of two components (interface & GUI) and offers the following services:

RMI Application Programming Interface (API)

- Allows Clearing Firms to programmatically send instructions to:
 - Block/Unblock order entry by:
 - Execution Firm
 - Account
 - Exchange
 - Derivative type (Futures or Options)
 - Side
 - Product designation optional

CME Group Risk Management Tools

RMI Graphical User Interface (GUI)

- Web-based interface that allows Clearing Firms to:
 - Block/Un-block order entry at the same levels as the API
 - View current blocks

Access to the RMI API is limited to Clearing Firms' certified proprietary and third-party risk management applications.

- The Client Impact Assessment (API) and User Guide (GUI) available online
- RMI certification via AutoCert+ is mandatory for Clearing Firms who wish to use the API
- Order cancellation functionality for the API only will be supported at a later date.
- For more information go to: www.cmegroup.com/rmi
- RMI Overview for Clearing Firms & Vendors on Wednesday, April 4 at CME Group

CME Globex Technical Documentation

A wiki format for CME Globex technical information

- Replaces the current PDF-format Software Development Kits, Client Impact Assessments and User Guides
 - Core and Advanced Functionality
 - Messaging Specifications
 - Electronic Trading Concepts
 - Risk management overviews
 - And more!
- Enhanced user experience
 - Improved content navigation
 - Comprehensive and granular full-text search capabilities
 - Meaningful topic associations through page links
- Easily accessible audit history
- Bookmark and share web pages
- Generate customized PDFs on-demand
- Launching Q2 2012

Agenda

1. Update on Regulatory Reform

2. Update on OTC Initiatives

- Products
- OTC Solutions: CME ConfirmHub, CME ClearPort

3. CME Clearing Europe

4. e-Trading Updates

- Globex Performance Enhancements
- Global Network Update
- NY DR Datacenter/Disaster Recovery
- CME Co-Location Services
- Market Data for OTC Products
- Firm Administrator Dashboard
- Risk Management Tools

Agenda, *continued*

5. New or Recently Launched Products

- Metals
 - Coil Options
 - Copper Calendar Swaps & Average Price Options
- Energy:
 - Thermal Coal
 - Crude & Refined products
 - Natural Gas
- Interest Rates:
 - Product Expansion
 - Economic Trends
 - Margining Efficiencies
- FX:
 - Order Execution Dashboard
 - Commitment of Traders Report
 - Ex-pit Volumes
- Equities:
 - Select Sector Futures
 - Short-dated Options on Futures

6. Partner Exchanges

- Latin American Partner Exchanges
- Bursa Malaysia Derivatives

7. Quiz & Q&A

Metals - Hot Rolled Coil Options (HRO)

Tailored for Commercial Operations of Steel Producers and consumers to tailor the risk every day, not just on futures delivery day. Options settles against 4 (sometimes 5) weekly assessment in a given month.

- NYMEX product, Financially Settled
- Over-the-counter with central clearing via CME ClearPort
- 24 consecutive Months
- Options with standard strike prices and based on weekly average prices during the delivery month
- Options tend to trade at lower volatility, i.e. less expensive because of the averaging process.

Metals - Copper Calendar Swap and Average Price Options (HGS and CAP)

Tailored for Commercial Operations of Copper Producers and Consumers to tailor the risk every day, not just on futures delivery day.

- **COMEX Product, Financially Settled**
- **Over-the-counter with central clearing via CME ClearPort**
- **24 consecutive months**
- **Both Swaps and Options are based on average prices of COMEX Copper Futures over a calendar month**
- **Options tend to trade at lower volatility, i.e. less expensive because of the averaging process**

Energy - Clearing Thermal Coal through CME ClearPort

Combining new with existing coal products, CME offers a comprehensive and global risk management solution for companies with swap futures and options on the following markets:

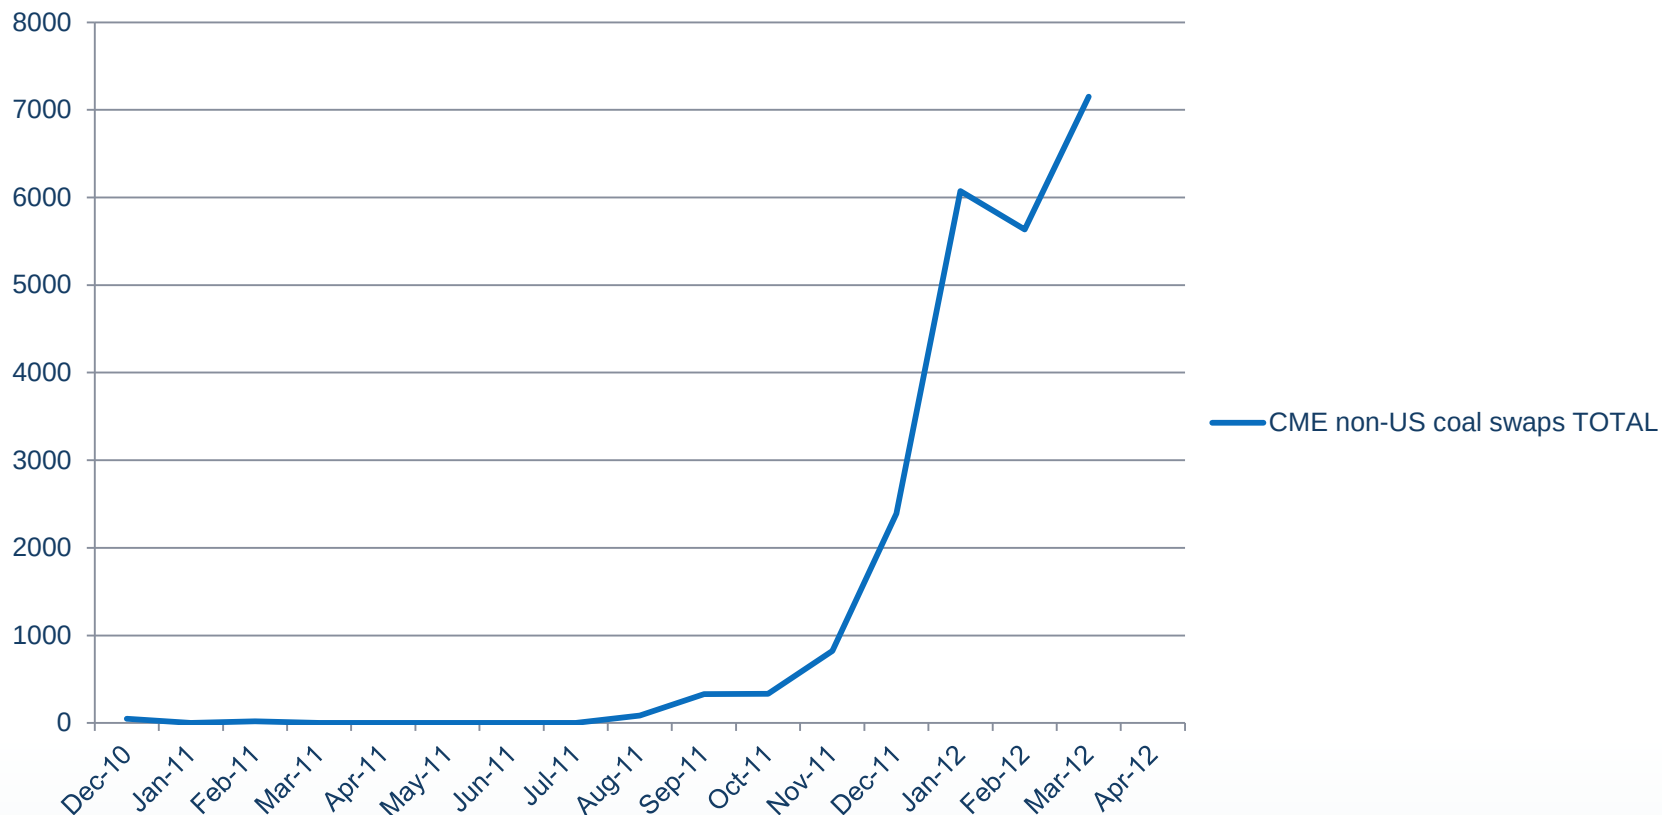

- API2 CIF ARA (Argus/McCloskey)
- API4 FOB Richards Bay (Argus/McCloskey)
- CFR China (IHS McCloskey/Xinhua Infolink)
- API6 FOB Newcastle (Argus/McCloskey)
- INDONESIAN Sub-Bituminous FOB (McCloskey)
- CENTRAL APPALACHIAN
- CSX Coal (Platts OTC Broker Index)
- Powder River Basin Coal (Platts OTC Broker Index)

Key Facts

- Straight Through Processing via Trayport
- Margin offsets
- Competitive fees

CME Non-US coal swaps

Recent marketing efforts have seen tremendous growth in our non-US coal products

*Graph indicates average per month

Energy – Crude & Refined Products

NBZ: NYMEX 25-Day (Platts) Brent Futures

Symbol	NBZ
Final Settlement	- Based on Platts 25-Day Brent cash assessment from the 16:30 London close. - Substantial improvement over existing ICE Brent's black box settlement formula that is not relevant as a convergence mechanism.
Benefits	Brent 25-Day Futures and Options contracts: - Accurately represent the underlying 25-day Brent cash market - Provide a superior convergence mechanism - First Expiration for the Feb 2012 Contract Month – Why Wait until Dec 2012 to hedge Brent Price Risk?
Incentives	Incentive programs in place for volume and / or open interest targets

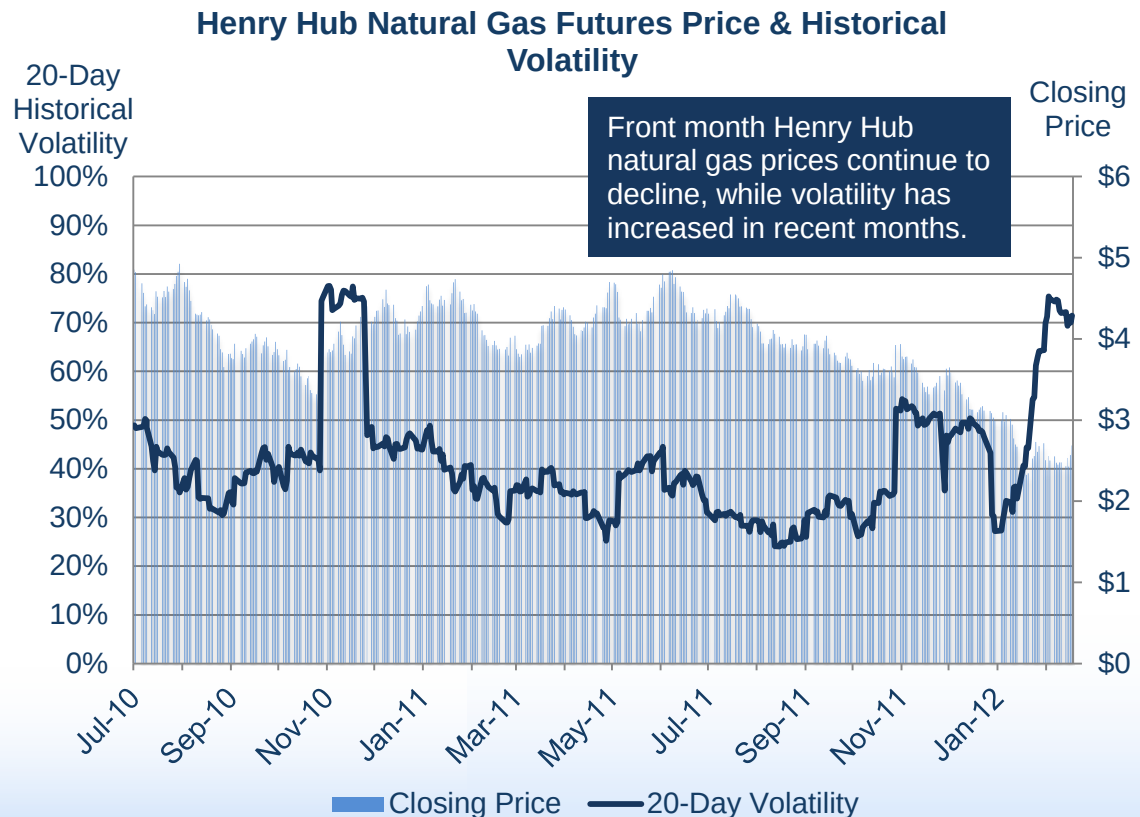

North American Infrastructure Improvements

- Increased production in northern US and Canada continues, allowing WTI-Brent price differential to persist
- Seaway Pipeline reversal expected online in 2012, increasing flows from Canada and Cushing, OK to refineries the US Gulf Coast, alleviating supply concerns; analysts expect further compression in WTI-Brent differential

Energy – Natural Gas Products

Continued opportunities in NYMEX Natural Gas products, spurred by low prices and increasing volatility

- Benchmark NG Henry Hub contract has had record volumes and record open interest levels in Jan/Feb 2012
- LN Henry Hub look-alike option has broken several open interest records in Jan/Feb 2012
- Chesapeake and ConocoPhillips have announced outright production curtailments and aggressive rig count reductions in response to low current natural gas prices, increasing market uncertainty

Interest Rate Futures and Options

Expansion, Liquidity, Opportunity

“Out the Curve” Risk/Opportunity

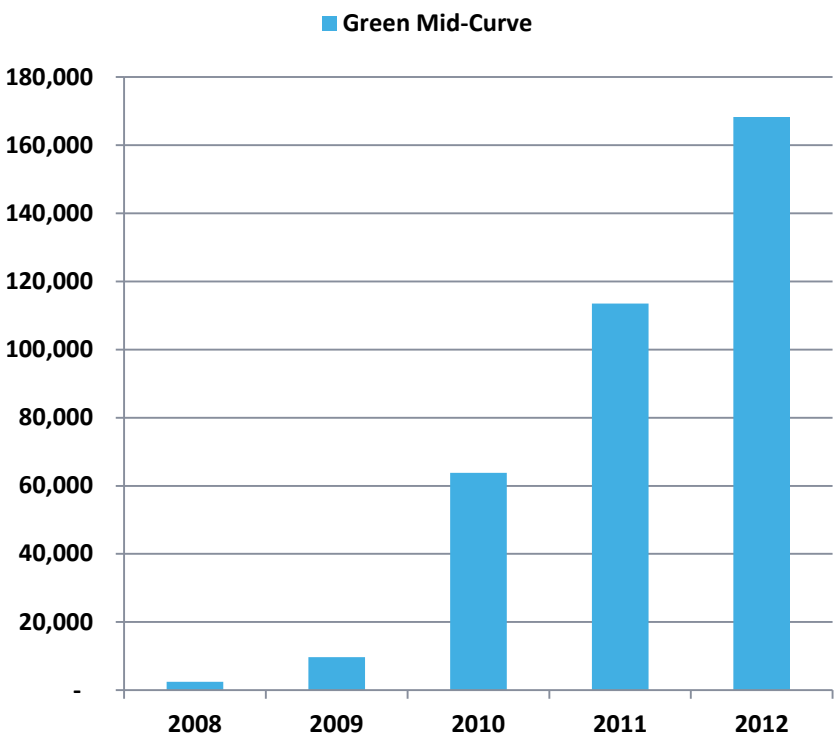

- **Deferred Eurodollar Futures**-Years 3-10, Expanded Market Maker Programs
- **Ultra Bond Futures and Options**- ADV > 47,000
- **Fed Funds Futures**-Added a 3rd Year
- **Fed Funds Mid Curve Options**-6 mo. And 1 Yr
- **Eurodollar Mid Curve Extensions**-Short dated options on deferred ED Futures, added third Year “Blues”-ADV >240,000
- **Expanded Quarterly Eurodollar Options**-3rd Year of Quarterly Options

Greater Precisions for Risk Management

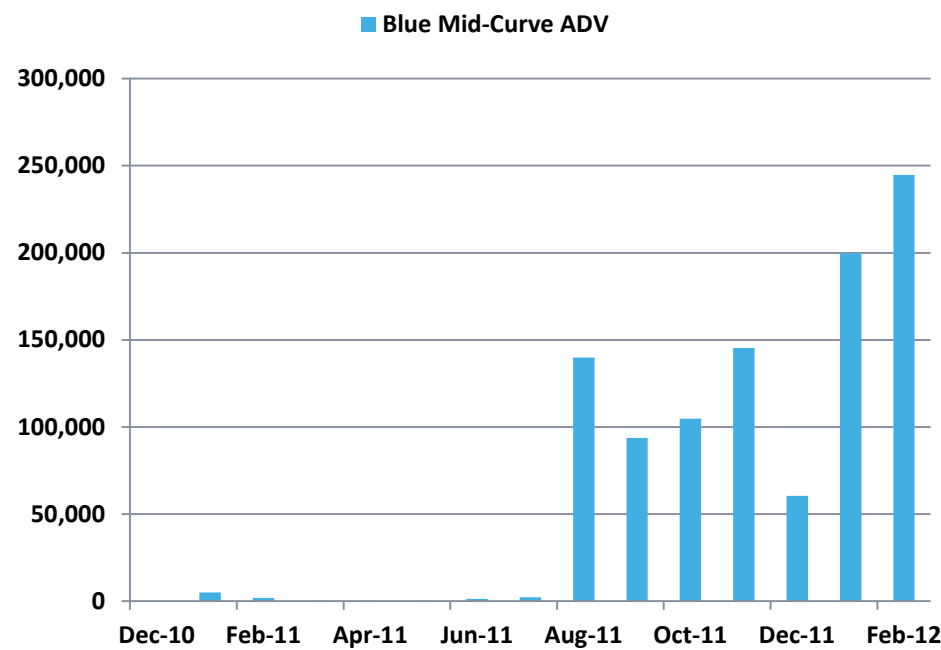

- **Weekly Options on Treasuries**- Over 3 Million Traded since Jan 2011 Launch
- **Expanded Strike Increments in 2 and 5 Year Note Options**- 1/8th-2Yr, 1/4-5Yr.

Products and Liquidity Reacting to Fed Policy and Customer Demand

2-Year "Green" Mid-Curve Annual ADV
Ex. March 2012 Option on March 2014 Underlying Eurodollar Future

3-Year "Blue" Mid-Curve Monthly ADV
Ex. March 2012 Option on March 2015 Underlying Eurodollar Future

Margining Efficiencies-Futures and IR Swaps

- Launched October 2011, **Euribor Futures** offer capital efficiencies between CME Group Interest Rate Products
- Ability to test margin offsets for clients as needed

Short 200 Euribor Long 100 2 Year US Treasury Note Futures Long 132 Eurodollar Futures DV01 is approximately flat	Dollar Amount*
Short 200 Euribor Futures Initial Margin	\$129,416.30
Long 100 2Y U.S. Treasury Note Futures Initial Margin	\$50,000.00
Long 132 Eurodollar Futures Initial Margin	\$59,400.00
-200 EB + 100 2Y + 132 ED WITHOUT cross-margining	\$238,816.30
-200 EB + 100 2Y + 132 ED WITH cross-margining	\$130,505.04
EFFICIENCY from cross margining	\$108,311.26
% Savings	45.4%

- Beginning in Q3 2012, Capital efficiencies between Interest Rate Futures and IR Swaps
- Followed by Euribor Futures and EUR IR Swaps

*These margin calculations represent member and hedger rates. Savings varies based on USD/EUR rate.

FX Order Execution Dashboard

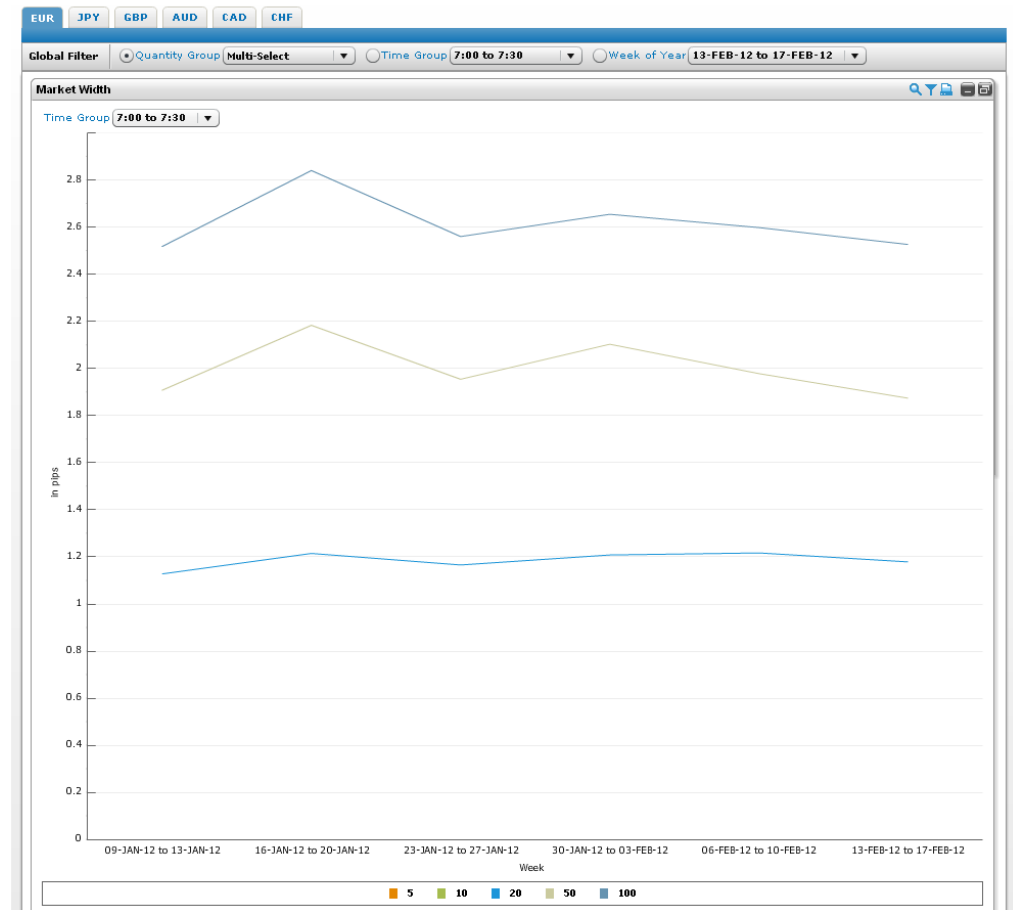

New On-Line Tool Launched December 2011

- **Customize data views** by order size, time of day (market open, midday and market close) and product
- **See** the distribution of order fill percentages
- **Check out** average execution speed of various order sizes
- **View** slippage rates vs. top of book and midpoint prices of bid/ask spreads
- **Compare** to the displayed order book with market width and depth charts

Ex-Pit Volumes

- Includes Blocks and EFP's
- Bilaterally agreed trades
- Runs parallel to our OTC FX Clearing initiative
- Utilises ClearPort
- 2011 posted 933% increase in ClearPort FX volumes
- Popular way to mitigate counterparty exposure
- Draws OTC and listed markets together

Ex-pit Volumes Since 2009/ADV lots

Record FX Open Interest !

- March 7th, CME FX recorded an Open Interest volume at **2,018,586** across FX Futures and Options venue. (Notional **US\$240.6 Billion**)
- This is 2% higher than our record open interest in June 2007
- With FX volumes down globally, this growing Open Interest displays not only the quality of CME FX liquidity but also an avenue for hedging and risk mitigation

E-mini S&P Select Sector Futures

Growing Buy-side Momentum in contracts

- Single day volume record of 5,398 contracts
- Record open interest of 8,243 positions (\$367 mm notional value)
- Tight bid/asks spreads (approx. \$0.01 - \$0.03) that are ETF equivalent with robust refresh rate (more liquidity / depth of book than showing on screen)
- Block and EFP eligible (50 contract minimum) with opportunity to achieve arrival price benchmark pricing

cmegroup.com/sectors

How Products Are Being Used by the Marketplace

- Alternative means of sector exposure with futures-style margining
 - Offers capital efficiency of futures with lower upfront capital requirements vs. other instruments
 - Potential for significant cross-margin offsets, particularly for sector spreads
- Some key applications by institutional users include sector rotation strategies, spreading, portfolio overlays cash equitization

 **CME Group**

Short-Dated Options on Futures

Weekly and month-end index options complement existing quarterly and serial expirations, offering:

- **Flexibility and precision** to manage shorter duration large-cap U.S. equity market exposure
- **More trading opportunities** around economic releases and market events

End-of-Month options:

- Expire on last business day of contract month
- Available for standard S&P 500 and E-mini S&P 500 options
- End-of-month E-mini S&P 500 options averaged 11,344 contracts in January 2012 – **up 18.5 percent vs. January 2011**

Weekly options:

- Available for standard S&P 500 and E-mini S&P 500 options – Expire on 1st, 2nd and 4th Fridays of contract month
- Available for standard NASDAQ-100 and E-mini NASDAQ-100 options – Expire on 1st, 2nd, 4th and (when applicable) 5th Fridays of contract month
- Weekly E-mini S&P 500 options averaged 24,045 contracts per day in January 2012 – **up 30.4 percent vs. January 2011**

Agenda

1. Update on Regulatory Reform

2. Update on OTC Initiatives

- Products
- OTC Solutions: CME ConfirmHub, CME ClearPort

3. CME Clearing Europe

4. e-Trading Updates

- Globex Performance Enhancements
- Global Network Update

www.cmegroup.com/customerforum

Futures trading is not suitable for all investors, and involves the risk of loss. Futures are a leveraged investment, and because only a percentage of a contract's value is required to trade, it is possible to lose more than the amount of money deposited for a futures position. Therefore, traders should only use funds that they can afford to lose without affecting their lifestyles. And only a portion of those funds should be devoted to any one trade because they cannot expect to profit on every trade.
