Change to procedure in the case of mistrades

Dear Sir or Madam,

We would like to inform you that SIX Swiss Exchange is changing its procedure for trade reversals in the case of on order book mistrades. This memorandum is intended to provide you with an overview of the key information and the timeframe for this changeover.

1 Current procedure

If Market Control at SIX Swiss Exchange declares a trade to be null and void in line with [Directive 4: Market Control](#), it publishes a mistrade decision on the [Newsboard](#) before contacting the participants involved by telephone to instruct them to cancel the relevant trades via trade reversal by the end of the clearing day at the latest.

2 New procedure

In the case of the **new procedure** mistrade decisions will also be published on the Newsboard. However, Market Control will now carry out the trade reversals for the invalid trades itself. The participants involved will be informed via the FIX interface and also via e-mail.

2.1 Details of the new regime

Below you will find a detailed overview of the new procedure and the changes involved:

Newsboard

As mentioned above, mistrade decisions and other trade-relevant information will continue to be published as messages on the Newsboard of the publicly accessible website of SIX Swiss Exchange. The Newsboard will in future be accessible via the following link, and will contain messages for **all** products and trading segments:

<http://www.six-swiss-exchange.com/participants/trading/newsboard/prod/>

From now on, the messages will be broken down into the following categories:

Trading Information
Mistrade
Suspension
Emergency Information

News Message

News messages will continue to be disseminated to participants in the form of «News Alerts» via the SWXess «Standard Trading Interface (STI)» and «Market Data Interface (MDI)». The «News Alert» contains the header of the message and a direct link to the corresponding message on the Newsboard.

Trade reversal

For all participants, trade reversals will be carried out by Market Control. This will generally be done at the same time as the mistrade decision; at the latest by the end of the clearing day.

The participants involved will receive confirmation of the trade reversals in the form of a «Trade Capture Report» sent via the SWXess «Standard Trading Interface (STI)». These reversal reports will be labeled with the newly introduced system generated trade type code «MR» (Mistrade Reversal).

Please note that trade reversals must still be carried out by participants themselves in the case of on exchange transactions, both on and off the order book, that have not been declared null and void by SIX Swiss Exchange.

In exceptional cases, the Exchange may also contact participants by telephone under the new procedure, instructing them to cancel mistrades themselves.

E-mail

As mentioned before in future the participants involved will be informed via e-mail of mistrades and their reversal; the affected participants will therefore no longer be informed by telephone as was previously the case.

For each trade reversal (transaction), SIX Swiss Exchange will send a separate e-mail containing the following information:

Security	Identification and trading currency of the security concerned
Transaction	• Execution time (trade date and time) • Designation of the type of business (purchase / sale) • Quantity (nominal value for bonds or price per unit for other securities) • Price • Exchange Identification (Trade Id)
Participant	• Identification of the participant (Member Id) • Identification of the trader (Trader Id)

Each participant is authorized to define a separate e-mail address for each Party ID. The participants are kindly requested to send an e-mail by the end of July to helpdesk.exc@six-group.com, specifying one e-mail address for each member ID, or inform Market Control explicitly if they do not wish to be notified via e-mail. Exchange Operations may be notified of a changed e-mail address at any time, subject to a two-day notice period.

Please note that SIX Swiss Exchange cannot guarantee successful transmission of the e-mail notification. For this reason, we recommend that participants ensure that «Trade Capture Reports» disseminated via the SWXess «Standard Trading Interface (STI)» are correctly implemented and processed in the members own applications.

SIX Swiss Exchange is planning to introduce the new mistrade regime as of September/October 2010. Prior to the introduction, participants will have a four-week period in which to test their internal applications and processes. We will send you further information on the introduction of the new regime in due course.

All technical manuals and MSC messages are published in the Member Section:

https://www.six-swiss-exchange.com/member_section/it/messages.html

https://www.six-swiss-exchange.com/member_section/it/manuals.html

Thank you for taking note of the above information. Should you have any questions, please contact SIX Swiss Exchange. If you require more information or support, please contact Exchange Operations.

If you have any technical inquiries, please contact your local support center.
